

One Way Management System

Making effective business decisions with real intelligence

TrueView One Way software system monitors one-way foot traffic flow through critical pathways for safety and security requirements such as in airports.

TrueView One Way can reduce costs and reduce the need for manual monitoring, it also allows you to monitor multiple sites remotely.

- Manage critical pathways for both safety and security
- Optimize staffing costs and deployment or personnel
- Automate access control system
- Manage multiple sites remotely
- Reduce cost for manual monitoring
