

Queue Management System

Making effective business decisions with real intelligence

TrueView Queue Management system means that you can quantify queue demand at any given time and inform staff of this data in real time.

Using TrueView Queue Management enables you to adjust your staffing levels to suit your store's needs, thus cutting down on staff planning, costs and more importantly customer waiting times.

For increased transparency, export store data from TrueView Queue Management and compare this with the existing POS data. Manage multi-site and multi-camera installations and remotely for a powerful sales tool.

- Reduce queuing time, increase shopping time and increase basket size
- Decreased queues optimizes staffing costs and deployment of personnel
- Automate and measure queue performance against service and productivity targets
- Encourage spending and build customer loyalty by decreasing check-out queues
- Ensure constant level of service at lowest possible cost
