

STORE PROTECT RF-ACE

Gateways new mono ACE antenna system is designed to perform with a wide detection range in challenging environments.

The aesthetically designed antenna is built on Gateways newly developed digital platform which is upgradable and compatible with emerging smart store solutions.

The system is a robust and trustworthy loss prevention solution, minimizing false alarms.

SPECIFICATIONS

ANTENNA FEATURES

- Mono RF RF transceiver antenna
- Detection on each side of the antenna
- Stylish plexiglass design with reinforcing aluminum profiles
- Profile standard color Silver
- Narrow footprint to save valuable space

ANTENNA SPECIFICATIONS

- Width.....490 mm
- Height.....1617 mm
- Thickness.....40 mm
- Thickness at base65 mm
- Weight..... 14,8 kg

ADD-ONS

- Remote service v4
- Protection buffers
- Etched logo

ALARM

- Audio level (adjustable)..... 95dBA

POWER CONSUMPTION

- 1 Antenna..... 12W
- Power Supply AC/DC adaptor
- Input 100-240V_{AC}, 50/60 Hz
- Output..... 24Vdc

WORKING FREQUENCY

- RF Center Frequency8.2MHz

ENVIRONMENTAL

- Ambient Temperature..... 0°C to 50°C, (32°F to > 122°F)
- Relative Humidity 0 to 90% Non-condensing

APPROVALS

- CE, CB, UL, ETL
